Greetings, and welcome to the Big Ten Academic Alliance 2022-2023 Academic Leadership Program (ALP). Among the many successful programs of the Big Ten Academic Alliance, the ALP stands out because of its focus on enhancing our most precious resource—our faculty and staff. As one of a select few invited to participate in this program, you join an elite group preparing to lead the distinguished universities of the Big Ten.

Since the Big Ten Academic Alliance ALP program began in 1989, over 1,700 faculty leaders have participated in the program with a great many moving on to positions in university administration, and all leaving with a greater understanding of the complex nature of the research university. I hope you find your time with us equally rewarding and enlightening. I look forward to working with you in the coming years and to sharing with you the many benefits and rewards of collaborative activity.

On behalf of the Provosts of our member universities, our headquarters staff, and the ALP Liaisons, I wish you much success in your academic career, and I encourage you to find ways to participate in Big Ten Academic Alliance activities and programs.

Best Wishes,

A handwritten signature in black ink that reads "Keith A. Marshall". The signature is fluid and cursive, with the first name "Keith" and last name "Marshall" clearly legible.

Big Ten Academic Alliance

ABOUT THE BIG TEN ACADEMIC ALLIANCE AND ALP

Big Ten Academic Alliance

The Big Ten Academic Alliance is a consortium of the Big Ten universities guided by the Provosts of the member universities. For over a half a century, these world-class research institutions have advanced their academic missions, generated unique opportunities for students and faculty, and served the common good by sharing expertise, leveraging campus resources and collaborating on innovative programs.

Deep levels of collaboration have resulted in multiple high-impact projects, including the following:

- Shared IT and library infrastructure
- Shared procurement
- Coordinated research
- Faculty development
- Shared communities of practice

The key strength of our coalition is that it leverages both investments and ideas. Our joint projects reflect an understanding that there is power in shared purpose and that, through aggregation of our resources, we can achieve far more than any one individual campus could ever hope to do alone. The efficacy of this approach can be seen in a growing array of transformative programs that expand educational opportunities, advance research, enhance efficiency, reduce costs, and amplify our impact in the wider world.

All consortium projects are voluntary. However, member universities share an expectation of cooperation and accountability. They also regard each other as peer institutions. Thus, despite the important distinctions, great similarities at the graduate level and across research enterprises contribute to a collective sense of purpose. The resulting collaborations benefit all of the member universities and serve the cause of American higher education in innumerable ways.

Academic Leadership Program (ALP): Program History

Academic administrators at the Big Ten institutions have dual roles. They must be educational leaders and at the same time act as managers of large complex organizations. They are challenged by tightening budgets, changing student populations, and increasing pressures from external sources. To find creative, workable solutions to the problems that lie ahead, our universities must pay serious attention to leadership development. Even though agencies, consulting firms, and institutions currently offer many professional development programs that serve the overall higher education community, our members wanted to create a program that would be specifically oriented to the challenges of academic administration at major research universities. The Academic Leadership Program (ALP) is one of the longest-serving professional development programs offered by the Big Ten Academic Alliance and all member institutions participate in the program. This intensive professional development experience develops the leadership and managerial skills of faculty who have demonstrated exceptional ability and administrative promise. The primary goal of the program is to help a select group of talented and diverse faculty further develop their ability to be effective academic leaders at all levels of research universities. Since its inception over 1,400 participants have completed the program. Many of whom have gone on to serve with distinction as college presidents, provosts, and deans.

Fellows

Each member institution establishes its own recruitment and selection process for identifying five to six Fellows to participate in the program each year. Fellows are faculty or select executive-level professional staff that are recognized as emerging academic leaders. The Fellows represent a variety of divisions across the university with varying levels and types of administrative and leadership experiences at the level of department or major committee chair, governance role, program director, or assistant or associate dean. Fellows are appointed for terms of one year and are expected to participate fully in the Program by attending all seminars and debrief group sessions and engaging in all aspects of the campus activities.

Program Format

The ALP Fellows participate in a mix of virtual and in-person sessions, debrief group sessions, and activities on their home campuses between seminars. Over the course of the year, a multitude of guest speakers address the group on identified thematic topics through case studies, workshops, and group exercises.

The seminar series for this fellowship year is listed below:

- Seminar I – October 13-15, 2022 (University of Nebraska-Lincoln)
- Seminar II, Session A – January 20, 2023 (virtual)
- Seminar II, Session B – February 24, 2023 (virtual)
- Seminar III – March 3-April 1, 2023 (Pennsylvania State University)

Liaisons

Institutional liaisons for the program have been appointed by each chief academic officer to serve as the central coordinator for the program and serve as the campus contact with the Big Ten Academic Alliance office. Liaisons supervise all aspects of the fellows' activities at their home institutions. Liaisons are responsible for the recruitment and selection of fellows and are essential in the program planning and implementation of the program and debrief groups, as well as the on-campus enrichment programs that support the ALP experience.

Local Programs

Each member institution conducts its own series of on-campus enrichment programs, with ALP liaisons serving as mentors throughout the fellowship year. These experiences may include orientation meetings and/or social events, briefings and/or debriefings before and after each seminar, local seminars focusing on University issues, participation in other faculty development programs available on campus, and individual projects or mentoring relationships with campus administrators.
